

THIS WAS SENT FROM A NOTIFICATION-ONLY ADDRESS THAT CANNOT ACCEPT INCOMING MAIL.
For help please contact the instructor at the email address provided on the
"Announcements" page of the course website. The assignment checker DOES NOT GRADE your
submissions but merely reports on issues so you can correct them and resubmit, thereby
avoiding unnecessary credit loss. ALL GRADING IS DONE MANUALLY BY THE INSTRUCTOR after
the assignment deadline based solely upon the NEWEST submission of each exercise. BE
WARE of correcting minor issues after the deadline since a late deduction will usually
be much greater than a minor issue deduction.

=====

"Compile-time" results:
2 warnings as follows:
2 exercise-specific warnings (custom validator);
"Run-time" results:
Program ran - No errors detected during preliminary testing (SEE ATTACHMENT);

STANDARD GRADING POLICY:
The MINIMUM deduction is the greater of the following for compile-time issues plus a
possible additional deduction for run-time issues, if any:
100% if any "goto" statement is used, else
~45% if any compiler or linker error, else
~25% if any warning, else
~15% if any advisory, else
0% if any recommendation.

C1A1E1: YOUR MINIMUM DEDUCTION: 1.8 points (~25%) To avoid deductions please correct
this exercise and resubmit to the assignment checker before the assignment deadline.

The custom validator found 2 problems. #####
